

Green Building for Building Professionals

Green Building for Building Professionals

Instructor(s): Benny Pritchett, CAPS, CGP

Learn how green homes provide buyers with lower energy costs and higher value. This 2-day course for building professionals discusses strategies for incorporating green-building principles into homes without driving up the cost of construction. You will learn how green homes provide buyers lower maintenance, better indoor air quality, and better long-term value. Techniques are also discussed for competitively differentiating your home products with increased indoor environmental quality as well as energy and resource efficiency.

As a graduate of this course, you will be able to:

- Employ resource-efficient materials to achieve comfortable, safe and sustainable buildings while achieving indoor air quality
- Implement indoor and outdoor water conservation practices
- Consider green building objectives in a remodeling project
- Apply successful business management, marketing and sales strategies to sell green
